

Mr. Geoffrey Wortley
American National Can Co.
8770 W. Bryn Mawr Avenue
Chicago, IL 60631-3542

Re: 127-11743
First Minor Permit Modification to
Part 70 No.: T127-7651-00030

Dear Mr. Wortley:

American National Can Company was issued Part 70 operating permit T127-7651-00030 on January 12, 1999, for a stationary beverage can end manufacturing plant. An application to modify the source was received on November 17, 1999. Pursuant to the provisions of 326 IAC 2-7-10.5 and 326 IAC 2-7-12 the Part 70 permit is hereby modified to incorporate the requirements of the Minor Source Modification No. 127-11554-00030 as follows (bold emphasis added to new language):

1. The Table of Contents on Page 3 of the permit has been revised to include information related to the new Section D.2 added to the permit.

Note: Page 3a was added to the permit to make space for the changes on Page 3.

2. The following Item (5) has been added to the emission unit description in Section A.2 on Page 4 of the permit:

(5) One (1) can end manufacturing line, identified as Module #5, consisting of one (1) three lane conversion press, one (1) compound liner and one (1) six out shell press, with a maximum capacity of 120,000 ends per hour, with no controls, and exhausting to the atmosphere.

Note: Page 5 of the permit was adjusted to make space for the changes on Page 4.

3. Condition D.1.2 on Page 27 of the permit shall be revised to more accurately define and limit the actual emissions increase associated with the increased throughput of Modules #1-#4 as a result of new equipment approved in CP 127-4956. The actual emissions increase was less than anticipated; therefore, the limited level of emissions established in the Part 70 Operating permit will be lowered to 63.0 tons per year based on the actual emissions increase of 20.2 tons per year rather than 24.8 tons per year. The revised condition shall be as follows:

D.1.2 Volatile Organic Compounds (VOC) Limitations [326IAC 2-3]

Pursuant to 326 IAC 2-3 (326 IAC 2-3 Emission Offset, ~~and~~ CP 127-4956-00030, **and Source Modification 127-11554-00030**), the total amount of VOC usage from the four (4) can end manufacturing lines shall be limited to ~~5.63~~ **5.25** tons per month. **This limited usage is equivalent to 63.0 tons of VOC emissions per year.**

4. Condition D.1.7 on Page 28 of the permit shall be changed to clearly state that compliance with the limit in Condition D.1.2 is based on VOC usage in Modules #1-#4 combined.

D.1.7 VOC Emissions

Compliance with Condition D.1.2 shall be demonstrated at the end of each month based on the **combined** total volatile organic compound usage **in Modules #1, #2, #3 and #4** for the most recent month.

5. Typographical errors have been corrected in Condition D.1.9 on Page 29 of the permit. Item (a) states records should be maintained to document compliance with Condition C.1 and D.1.1. The intent of the record keeping requirements is to demonstrate compliance with the coating content and VOC usage limitations contained in Conditions D.1.1 and D.1.2 (not C.1). Also, Item (c) of this condition has been revised as follows to be Item (b) because there are only two items under the condition and the first one is Item (a):

D.1.9 Record Keeping Requirements

(a) To document compliance with Conditions ~~C.1 and~~ D.1.1 **and D.1.2**, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Conditions ~~C.1 and~~ D.1.1 **and D.1.2**:

- (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
- (2) A log of the dates of use;
- (3) The volume weighted VOC content of the coatings used for each day;
- (4) The cleanup solvent usage for each month;
- (5) The total VOC usage for each month; and
- (6) The weight of VOCs emitted for each compliance period.

~~(c)~~**(b)** All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

6. A typographical error has been corrected in Condition D.1.10 on Page 29 of the permit. The quarterly reporting requirement was intended to demonstrate compliance with the VOC emission limitation in Condition D.1.2. The condition shall be revised as follows:

D.1.10 Reporting Requirements

A quarterly summary of the information to document compliance with Condition ~~C.4~~
D.1.2 shall be submitted to the address listed in Section C - General Reporting
Requirements, of this permit, using the reporting forms located at the end of this permit,
or their equivalent, within thirty (30) days after the end of the quarter being reported.

7. The limit information in the quarterly report form on Page 33 of the permit has been revised as follows to be consistent with the changes to Condition D.1.2:

Source Name:	American National Can Company
Source Address:	4001 Montdale Park Drive, Valparaiso, IN 46383
Mailing Address:	8770 West Bryn Mawr Avenue, Chicago, IL 60631-3504
Part 70 Permit No.:	T127-7651-00030
Facility:	Source Modules #1, #2, #3 and #4
Parameter:	VOC
Limit:	5-63 5.25 tons/month

8. A new Section D.2 and an associated new quarterly report form for Module #5 have been added as Pages 29a, 29b, 29c and 33a of the permit.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this modification and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Janusz Johnson, at (800) 451-6027, press 0 and ask for Janusz Johnson or extension (2-8325), or dial (317) 232-8325.

Sincerely,

Paul Dubenetzky, Chief
Permits Branch
Office of Air Management

PART 70 OPERATING PERMIT OFFICE OF AIR MANAGEMENT

**American National Can Company
4001 Montdale Park Drive
Valparaiso, Indiana 46383**

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 and 326 IAC 2-1-3.2 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: T127-7651-00030	
Issued by: Janet G. McCabe, Assistant Commissioner Office of Air Management	Issuance Date: January 12, 1999

First Minor Permit Modification: 127-11743	Pages Affected: 3, 3a, 4, 5, 27, 28, 29, 29a, 29b, 29c, 33, 33a
Issued by: Paul Dubenetzky, Branch Chief Office of Air Management	Issuance Date:

SECTION A

SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Management (OAM). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

The Permittee owns and operates a stationary beverage can end manufacturing plant.

Responsible Official: Geoffrey Wortley
Source Address: 4001 Montdale Park Drive, Valparaiso, IN 46383
Mailing Address: 8770 West Bryn Mawr Avenue, Chicago, IL 60631-3504
SIC Code: 3411
County Location: Porter
County Status: Nonattainment for volatile organic compounds
Attainment for all other criteria pollutants
Source Status: Part 70 Permit Program
Major Source, under PSD and Emission Offset Rules;
Minor Source, Section 112 of the Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

- (1) One (1) can end manufacturing line, identified as Module #1, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (2) One (1) can end manufacturing line, identified as Module #2, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (3) One (1) can end manufacturing line, identified as Module #3, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (4) One (1) can end manufacturing line, identified as Module #4, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (5) One (1) can end manufacturing line, identified as Module #5, consisting of one (1) three lane conversion press, one (1) compound liner and one (1) six out shell press, with a maximum capacity of 120,000 ends per hour, with no controls, and exhausting to the atmosphere.

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)]
[326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (1) Natural gas-fired combustion sources with heat input equal to or less than ten (10) million Btu per hour.
 - (a) One (1) air make-up unit rated at 1,878,000 Btu per hour.
- (2) Propane or liquified petroleum gas, or butane-fired combustion sources with heat input equal to or less than six (6) million Btu per hour.
- (3) Equipment powered by internal combustion engines of capacity equal to or less than 500,000 Btu per hour, except where total capacity of equipment operated by one stationary source exceeds 2,000,000 Btu per hour.
- (4) Vessels storing lubricating oils, hydraulic oils, machining oils and machining fluids.
- (5) Filling drums, pails or other packaging containers with lubricating oils, waxes and greases.
- (6) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment and welding equipment.
- (7) Paved and unpaved roads and parking lots with public access.
- (8) Particulate emissions from recycled trim material recovery.
- (9) Storage tanks containing tab lube.

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) it is a major source, as defined in 326 IAC 2-7-1(22); and
- (b) it is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

SECTION D.1

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]

- (1) One (1) can end manufacturing line, identified as Module #1, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (2) One (1) can end manufacturing line, identified as Module #2, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (3) One (1) can end manufacturing line, identified as Module #3, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.
- (4) One (1) can end manufacturing line, identified as Module #4, consisting of one (1) shell blanking press, four (4) HSL-8 lid liners and three (3) conversion presses, with a maximum capacity of 340,200 ends per hour, with no controls, and exhausting to the atmosphere.

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.1.1 Volatile Organic Compounds (VOC) [326 IAC 8-2-3]

Pursuant to 326 IAC 8-2-3(b) (Can Coating Operations), the emissions from the beverage can coating operations shall not discharge volatile organic compounds in excess of the following:

Coating	326 IAC 8-2-3(b)(4) Limit (lb VOC/gal), less water
End Seal Coat	3.7

D.1.2 Volatile Organic Compounds (VOC) Limitations [326 IAC 2-3]

Pursuant to 326 IAC 2-3 (326 IAC 2-3 Emission Offset, CP 127-4956-00030, and Source Modification 127-11554-00030), the total amount of VOC usage from the four (4) can end manufacturing lines shall be limited to 5.25 tons per month. This limited usage is equivalent to 63.0 tons of VOC emissions per year.

D.1.3 Particulate Matter (PM) [326 IAC 6-3-2(c)]

Pursuant to 326 IAC 6-3-2, the particulate matter (PM) overspray from the end seal coating facilities shall be limited by the following:

Interpolation and extrapolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67}$$

where E = rate of emission in pounds per hour and
P = process weight rate in tons per hour

D.1.4 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

Compliance Determination Requirements

D.1.5 Testing Requirements [326 IAC 2-7-6(1),(6)]

The Permittee is not required to test this facility by this permit. However, IDEM may require compliance testing at any specific time when necessary to determine if the facility is in compliance. If testing is required by IDEM, compliance with the VOC limit specified in Conditions C.1 and D.1.1 shall be determined by a performance test conducted in accordance with Section C - Performance Testing.

D.1.6 Volatile Organic Compounds (VOC)

Compliance with the VOC content and usage limitations contained in Conditions D.1.1 and D.1.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer. IDEM, OAM, reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

D.1.7 VOC Emissions

Compliance with Condition D.1.2 shall be demonstrated at the end of each month based on the combined total volatile organic compound usage in Modules #1, #2, #3 and #4 for the most recent month.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.1.8 Particulate Matter (PM)

Pursuant to CP 127-4956-00030, issued on January 22, 1996, the overspray from the end seal coating facilities shall be considered in compliance provided that the overspray is not:

- (a) visibly detectable at the exhaust;
- (b) detectable on the rooftops; or
- (c) detectable on the ground.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.1.9 Record Keeping Requirements

- (a) To document compliance with Conditions D.1.1 and D.1.2, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Conditions D.1.1 and D.1.2:
 - (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The volume weighted VOC content of the coatings used for each day;
 - (4) The cleanup solvent usage for each month;

- (5) The total VOC usage for each month; and
- (6) The weight of VOCs emitted for each compliance period.
- (b) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.1.10 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.1.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported.

SECTION D.2

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)]

- (5) One (1) can end manufacturing line, identified as Module #5, consisting of one (1) three lane conversion press, one (1) compound liner and one (1) six out shell press, with a maximum capacity of 120,000 ends per hour, with no controls, and exhausting to the atmosphere.

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.2.1 Volatile Organic Compounds (VOC) [326 IAC 8-2-3]

Pursuant to 326 IAC 8-2-3(b) (Can Coating Operations), the emissions from the beverage can coating operation shall not discharge volatile organic compounds in excess of the following:

Coating	326 IAC 8-2-3(b)(4) Limit (lb VOC/gal), less water
End Seal Coat	3.7

D.2.2 Volatile Organic Compounds (VOC) Limitations [326 IAC 2-3]

Pursuant to 326 IAC 2-3, the total amount of VOC usage from the Module #5 can end manufacturing line shall be limited to 783.3 pounds per month. This limited usage is equivalent to 4.7 tons of VOC emissions per year.

D.2.3 Particulate Matter (PM) [326 IAC 6-3-2(c)]

Pursuant to 326 IAC 6-3-2, the particulate matter (PM) overspray from the end seal coating facility shall be limited by the following:

Interpolation and extrapolation of the data for the process weight rate up to sixty thousand (60,000) pounds per hour shall be accomplished by use of the equation:

$$E = 4.10 P^{0.67} \quad \text{where } E = \text{rate of emission in pounds per hour and} \\ P = \text{process weight rate in tons per hour}$$

D.2.4 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan, in accordance with Section B - Preventive Maintenance Plan, of this permit, is required for this facility and any control devices.

Compliance Determination Requirements

D.2.5 Testing Requirements [326 IAC 2-7-6(1),(6)]

The Permittee is not required to test this facility by this permit. However, IDEM may require compliance testing at any specific time when necessary to determine if the facility is in compliance. If testing is required by IDEM, compliance with the VOC limit specified in Conditions C.1 and D.2.1 shall be determined by a performance test conducted in accordance with Section C - Performance Testing.

D.2.6 Volatile Organic Compounds (VOC)

Compliance with the VOC content and usage limitations contained in Conditions D.2.1 and D.2.2 shall be determined pursuant to 326 IAC 8-1-4(a)(3) and 326 IAC 8-1-2(a) using formulation data supplied by the coating manufacturer. IDEM, OAM, reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

D.2.7 VOC Emissions

Compliance with Condition D.2.2 shall be demonstrated at the end of each month based on the total volatile organic compound usage in Module #5 for the most recent month.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.2.8 Particulate Matter (PM)

Pursuant to CP 127-4956-00030, issued on January 22, 1996, the overspray from the end seal coating facilities shall be considered in compliance provided that the overspray is not:

- (a) visibly detectable at the exhaust;
- (b) detectable on the rooftops; or
- (c) detectable on the ground.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.2.9 Record Keeping Requirements

- (a) To document compliance with Conditions D.2.1 and D.2.2, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Conditions D.2.1 and D.2.2:
 - (1) The amount and VOC content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The volume weighted VOC content of the coatings used for each day;
 - (4) The cleanup solvent usage for each month;
 - (5) The total VOC usage for each month; and
 - (6) The weight of VOCs emitted for each compliance period.
- (c) All records shall be maintained in accordance with Section C - General Record Keeping Requirements, of this permit.

D.2.10 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.2.2 shall be submitted to the address listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported.
